

MODEL
A71 VDS LRM
DESCRIPTION

The voltage detector is a fixed visual presence-voltage detection device for Medium-Voltage electrical distribution boards complying with product standard IEC 61243-5.

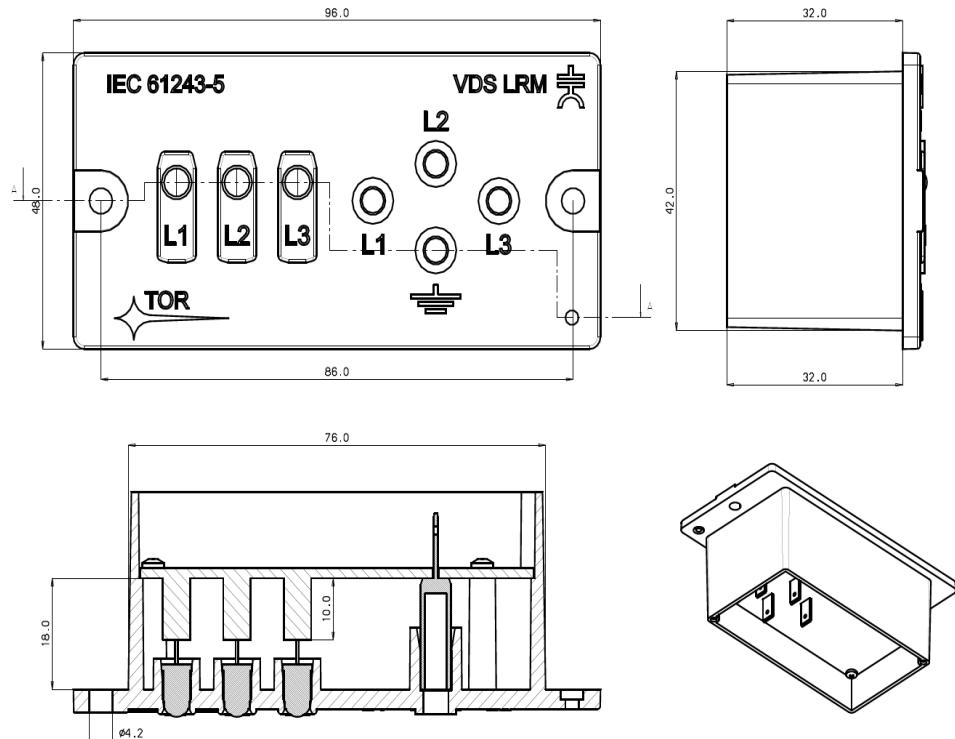

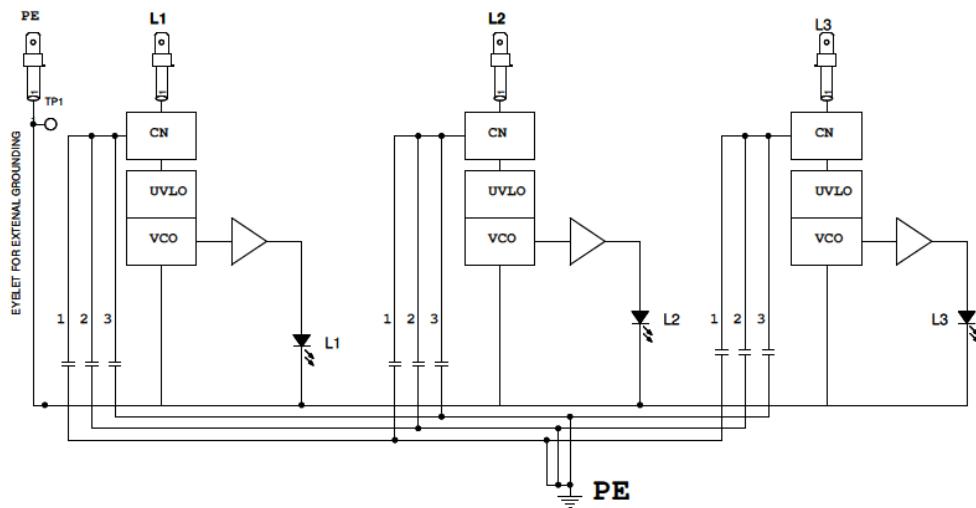

The visual indication is LED indicators of amber color. Connections to phases L1, L2, L3 and grounding are available on the back by fast-on type connections and on the front by plug bushing type connections (diameter 4 mm, length 19 mm, pitch between each phase bushing and the single earth point 14 mm)

FEATURES
